

Professional Remote Drone Pilot Certification Program

2 Day Intensive Training with theory and practical flying sessions

Axsel Management International Sdn. Bhd. in collaboration with Australia Institute of Business & Technology (AIBT) and Ace Aviation Aerospace Academy, Australia's largest multi campus training facility, is pleased to offer a professional certification course on the ever growing Remotely Piloted Aircraft (RPA) industry.

Introduction

Gain the knowledge and skills to operate a remote-controlled drone. This course is necessary to operate for business. Current Remote Pilot Certification holders can also benefit from the program to brush up on their knowledge for re-certification.

Drones can be used by:

- Realtors—post striking aerial pictures and videos of properties for sale
- Videographers—make a living shooting aerial video for a variety of businesses
- Farmers—survey crops from above without having to leave the house
- Hobbyists—have fun soaring the skies and capturing amazing images

Objectives:

- To provide unmanned aerial support service to clients in a variety of industries
- To develop drone flight plans in accordance with regulations
- To assist in data processing of imagery collected during drone flights
- To coordinate and conduct drone flight operations, testing, and training
- To provide crew leadership for any anomalies or emergency situations

Target Audience

This program is specially designed for individuals who wish to obtain their Professional Drone Pilot Training via interactive class room learning and to join the rapidly growing drone industry.

Course Outline
